

FORMAL JOB RECOMMENDATION

Subject: Letter of Recommendation for Cynthia Hutaurok.

To Whom It May Concern,

I am writing to recommend Cynthia Hutaurok for a position with your company. I have had the pleasure of teaching Cynthia for the duration of the Software Engineering Training Program specializing in the MERN Stack.

Cynthia is a focused and determined individual who is driven to apply everything she has learned. A testament to her drive is her ability to maintain a 100% average in class and complete the assigned projects in a timely fashion. She has built 3 projects and completed many assignments focusing on JavaScript and MongoDB, as well as posing challenging questions to elevate her knowledge and that of the class. Cynthia has a keen attention to detail to help troubleshoot issues and a determination to find solutions to any problem.

After having the pleasure and privilege of working with Cynthia for the duration of her training, I can confidently recommend that she will work consistently and diligently for your organization.

Ariel Stitt
Instructor of Software Engineering
